SAVING ENERGY...HOW DO I DO THAT FROM MY ROOM?
Turn off your desk lamp and use natural lighting from your window—the sun!

Unplug your laptop once the battery is charged.

• Vampire energy happens when something is plugged in and its energy is not being used, how wasteful!

Unplug chargers, game consoles, etc. when not in use (see above)
BUT WHAT ABOUT WHEN I'M OUTSIDE OF MY ROOM?
Remember to turn off your lights when you leave your room!

Cut your shower time in half—compete against friends to see who can shower the fastest!

Turn off and unplug all electronics.

• Hint hint: you can plug electronics into a power strip to make it easier to “unplug” all devices at once.
DOESN’T THE LAUNDRY PROCESS USE A LOT OF ENERGY?
YES!

Wash your clothes in **COLD** water! It has so many benefits:

- It saves energy by not heating the water.
- Your clothes will be more durable in the long run.
- It makes your colors less likely to bleed—no more pink-dyed t-shirts!
- It makes colors less likely to fade.
THE DRYING RACK: YOUR NEW BEST FRIEND

It uses NO energy at all!

It helps clothes last longer.

It keeps clothes from shrinking.

It’s available for FREE use at your hall, so ask the front desk today!
